

Business Continuity Training Program

“Good Practice Guidelines”

Business Continuity is about building and improving resilience in your business, it's about identifying your key products and services and the most urgent activities that underpin them and then, once that 'analysis' is complete, it is about devising plans and strategies that will enable you to continue your business operations and enable you to recover quickly and effectively from any type of disruption; whatever its size or cause.

Effective BCM at any organisation depends on becoming competent in the discipline while demonstrating evidence of due process. This normally involves training people to become competent in all technical and management aspects of BCM, running and improving a business continuity management system and having documentary evidence of all plans, processes and procedures.

Therefore, The Institute of Bankers Pakistan and The Business Continuity Institute jointly brings an internationally recognized training aimed at developing understanding of Business Continuity Management and its implementation.

THE INSTITUTE OF BANKERS PAKISTAN (IBP):

The Institute of Bankers Pakistan is an ISO 9001:2008 certified recognized institute dedicated to providing training services for banking industry in Pakistan to provide a sound human resource base for the financial sector through continuous learning, adaptation and application of knowledge. We provide various other services including international accredited banking qualification e.g IBP Superior Qualification (ISQ), Assessment & Recruitment services, Research & Publications as well as we

extend academic support to universities.

THE BUSINESS CONTINUITY INSTITUTE:

The Business Continuity Institute (BCI) is the world's leading institute for business continuity. Established in 1994, the BCI has established itself as the leading membership and certifying organization for Business Continuity (BC) professionals worldwide.

BENEFITS OF CBCI

The certificate of BCI (CBCI) offers a wide range of benefits:

- **Professional competency:** The CBCI is an assurance that professionals have a comprehensive knowledge and understanding of the theory of BC good practice. This theory is based on the Good Practice Guidelines (aligned to ISO 22301-the international standard for BCM). The CBCI is an ideal qualification for professionals who wish to begin or move into a career where they must demonstrate knowledge and understanding of good practice in BC.
- **Employer recognition:** The CBCI is internationally recognised giving practitioners an “edge” with potential employers aro the world who recognise the value of the certification. Prospective employers have the added benefit of access to certified practitioners which can help towards achieving alignment with certification against ISO 22301.
- **Classroom based instructor-led learning options:** The delivery of all BCI classroom-based CBCI training is provided only by Approved BCI

Instructors. They are highly experienced practitioners themselves.

- **Professional status:** The CBCI is a certified grade of BCI membership which recognises your professional status. Upon passing the examination at the appropriate level, and subject to proof of professional experience, successful exam candidates will be entitled to progress to the grade of an Associate Member of the BCI (AMBCI) or Member of the BCI (MBCI). BCI Membership unlocks a whole suite of benefits that help members advance in their chosen careers.

METHODOLOGY

The CBCI course is classroom based and includes power point presentations, syndicate discussions, workshops and case studies. It lasts for 4 days and includes a two-hour multiple-choice exam on the morning of August 18, 2016.

The CBCI teaches people the what, why, how and when of Business Continuity. It is the most respected and universally acclaimed BCM preparation course in the world, today. It is a course which prepares people for doing BCM (e.g. departmental coordinators and BC manager) but also explores the relationship with Risk and Crisis Management and how these disciplines are connected.

FACILITATOR

Mr. James Royds (Hon)
