Mr. Shoukat Bizinjo
Mr. S.M. Arif

COURSE OVERVIEW

The evolving role of technology in financial services sector has become increasingly important. A growing number of financial institutions (FIs) in Pakistan now employ technology as leverage to offer innovative products, deliver fast and efficient services. As technology becomes an integral part of business and operations of FIs, such technology usage and dependence, if not properly managed, may increase various risks. With a vision to provide baseline technology governance and risk management principles to FIs, SBP developed framework on 'Enterprise Technology Governance & Risk Management in Financial Institutions'. The framework is aimed to enable FIs to keep abreast with widespread adoption of technology in financial services industry with appropriate risk management. The course will help the participants in better understanding of optimal utilization of technology for enabling the business processes.

SBP'S FRAMEWORK ON ENTERPRISE TECHNOLOGY GOVERNANCE & RISK MANAGEMENT FOR FIs

The Institute
of Bankers
Pakistan
